

Texas Commission on Environmental Quality
Form OP-UA25
Synthetic Fiber Production Attributes

General:

This form is used to provide a description and data pertaining to all synthetic fiber production facilities with potentially applicable requirements associated with a particular regulated entity number and application. Each table number, along with the possibility of a corresponding letter (i.e., Table 1a, Table 1b), corresponds to a certain state or federal rule. If the rule on the table is not potentially applicable to a synthetic fiber production facility then it should be left blank and need not be submitted with the application. If the codes entered by the applicant show negative applicability to the rule or sections of the rule represented on the table, then the applicant need not complete the remainder of the table(s) that corresponds to the rule. Further instruction as to which questions should be answered and which questions should not be answered are located in the "Specific" section of the instruction text. The following is included in this form:

Table 1: Title 40 Code of Federal Regulations Part 60 (40 CFR Part 60)
Subpart HHH: Standards of Performance for Synthetic Fiber Production Facilities

The Texas Commission on Environmental Quality (TCEQ) Regulated Entity Number (XX-XXXX-X) and the application area name from the Form OP-1 (Site Information Summary) must appear in the header of each page for the purpose of identification for the initial submittal. The date of the initial form submittal must also be included and should be consistent throughout the application (MM/DD/YYYY). **Leave the permit number blank for the initial form submittal.** If this form is included as part of the permit revision process, enter the permit number assigned by the TCEQ, the area name (from Form OP-1), the date of the revision submittal, and the regulated entity number.

Unit attribute questions that do not require a response from all applicants are preceded by qualification criteria in the instructions. If the unit does not meet the qualification criteria, a response to the question is not required. **Anytime a response is not required based on the qualification criteria, leave the space on the form blank.**

Notwithstanding any qualification criteria in the form instructions or information provided in other TCEQ guidance, the applicant may leave an attribute question blank (or indicate "N/A" for "Not Applicable") if the attribute is not needed for the applicable requirement determinations of a regulation for a unit.

In some situations, the applicant has the option of selecting alternate requirements, limitations, and/or practices for a unit. Note that these alternate requirements, limitations, and/or practices must have the required approval from the TCEQ Executive Director and/or the U.S. Environmental Protection Agency Administrator before the federal operating permit application is submitted.

Specific:**Table 1: Title 40 Code of Federal Regulations Part 60 (40 CFR Part 60)
Subpart HHH: Standards of Performance for Synthetic Fiber Production Facilities**

Process ID No.: Enter the identification number (ID No.) for the synthetic fiber production facilities or process (maximum 10 characters) as listed on Form OP-SUM (Individual Unit Summary).

SOP Index No.: Site operating permit (SOP) applicants should indicate the SOP index number for the unit or group of units (maximum 15 characters consisting of numeric, alphanumeric characters, and/or dashes prefixed by a code for the applicable regulation [i.e., 60KB-XXXX]). For additional information relating to SOP index numbers, please refer to the TCEQ website at www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_initial.pdf.

Construction or Modification Date: Select one of the following codes that describes the date of commencement of the most recent construction, reconstruction, or modification. Enter the code on the form.

Code	Description
82-	On or before November 23, 1982
82+	After November 23, 1982

▼ **Continue only if “Construction/ Modification Date” is “82+.”**

Production Process: Select one of the following codes that describes the process used and product made at the facility. Enter the code on the form.

Code	Description
REACT	Reaction spinning process to produce spandex fiber
VISCOSE	Viscose process to produce rayon fiber
SOLVENT	Solvent spun synthetic fiber process

★ **Complete “Quantity of Fiber Produced” if “Production Process” is “Solvent.”**

Quantity of Fiber Produced: Select one of the following codes for the quantity of fiber produced at the facility. Enter the code on the form.

Code	Description
500-	Less than or equal to 500 Mg of fiber per year
500+	Greater than 500 Mg of fiber per year
